Why I Participate

I participate because I have friends living with MS.

About MS

I am asking you to support me in Walk MS because this is a cause that is meaningful to me. Millions of people are affected by MS and the challenges of living with its unpredictable symptoms. Multiple sclerosis interrupts the flow of information between the brain and the body and it stops people from moving. Every hour in the United States, someone is newly diagnosed with MS, a disease of the central nervous system. Symptoms range from numbness and tingling to blindness and paralysis. The progress, severity and specific symptoms of MS in any one person cannot yet be predicted, but advances in research and treatment are moving us closer to a world free of MS.
